Group Art Unit: 1797
Examiner: Frank M. Lawrence, Jr.
Title: METHOD AND DEVICE FOR DISCHARGING AND DEHUMIDIFYING AIR IN A COOKING AREA

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Sir:

This SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT is being filed based on newly discovered references dated September 1, 2008.

In accordance with 37 C.F.R. 1.98, there is submitted herewith a completed "SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT BY APPLICANTS" (*Form PTO/SB/08A*) with patents and/or publications as delineated therein attached.

JP2001-190925 discloses two changeover dampers for changing over dehumidification and regeneration are arranged on the same axis not only to simplify the ventilation circuit constitution but also to allow the bypass air stream to flow not only at a time of dehumidification but also at a time of regeneration. A positive characteristic element is used in a heater to prevent the temperature rise of the heater.

If no translation of pertinent portions of any foreign language patents or publications mentioned within the "SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT BY APPLICANTS" is included with the aforementioned copies of those applications, patents and/or publications, it is because no existing translation is readily available to the Applicants.

As per the Notice in 1273 OG 55 (August 5, 2003) no copies of any above-mentioned US patents and US patent application publications are submitted for this application which was filed after June 30, 2003.

Respectfully submitted

Russell W. Warnock
